The screenshot displays the Crashlytics dashboard for the 'CommunityQuiz' app. At the top, the 'Filter' button is set to 'Event type = "Crashes"'. The 'Crash-free statistics' section shows 'Crash-free users' with a value of 3. The 'Trends' section features a bar chart with two series: 'Crashes' (blue bars) and 'Users affected' (orange bars). The x-axis represents dates from May 03 to May 07. The y-axis ranges from 0 to 3. The 'Crashes' series shows a value of 3 on May 03 and 1 on May 05. The 'Users affected' series shows a value of 1 on May 03 and 1 on May 05. Below the trends, the 'Issues' section is visible, showing a table of issues. The first issue is 'ServerInteractor.kt - line 12' with a subtitle 'hu.bme.communityquiz.interactor.ServerInteractor.getCategories', categorized as a 'Crash' in version '1.0 - 1.0', affecting 3 users.

Crashes	Users affected
3	1

Issues	Event type	Versions	Events	Users
ServerInteractor.kt - line 12 hu.bme.communityquiz.interactor.ServerInteractor.getCategories	Crash	1.0 - 1.0	3	1
